01 INTRODUCTION

This kit is for anyone in the AOSSIE community: contributors, collaborators, builders, and curious minds who want to understand and use the AOSSIE brand with consistency and care.

Inside, you'll find our assets, guidelines, principles, visual identity, and best practices. It's everything you need to confidently represent AOSSIE across symbols, icons, logos, social media platforms, and branding.

It is important to read these guidelines carefully to understand the rules of how we communicate with the audience. By sticking to these guidelines we create a recognizable and uniform look for our audience.

02 LOGOS // Overview

The AOSSIE logo is a thoughtful blend of identity, technology, and mission. The Australian silhouette establishes its roots, while the binary code pattern symbolizes software development & digital innovation.

The stylized braces {} in the wordmark subtly reference programming languages, creating an immediate connection with the dev community.

Use the instructions below to use any asset from this branding kit after selecting the element.

To export the selected asset

After selecting the element, In the bottom right of your Figma application, you would spot the ability to export any asset in the required format.

Primary Logo

Secondary Logo

Logomark

These are the official SVG files, that one should use during all their endeavors related to AOSSIE. Examples include Project Branding/Integration, Web info projection, sponsorships, etc.

02 LOGOS // Dark & Light Variations

The AOSSIE logos are flexible, adaptable and readable. Whether it's a favicon or a keynote screen, maintain legibility by never scaling below 24 px height and width. Always test for clarity before publishing.

Primary Logo: Optimized for limited horizontal space while maintaining brand identity.

Secondary Logo: A minimal design, ideal for wide spaces and horizontal branding.

Consistency Logo: These variations ensure consistent branding across diverse platforms, formats and color conditions .

Logomark: A standalone icon, used when the brand name is unnecessary but recognition is key.

The purpose of these secondary counterparts of primary assets is to usually have constructed assets for a minimal look whenever needed.

03 COLOUR SCHEME

The AOSSIE colour palette is inspired by Australia's national colours and reflects the organisation's roots, growth, innovation, and optimism. . The combination of Golden Wallet and Baggy Green creates a distinctive visual identity that is both memorable and instantly recognizable.

Whenever utilizing these colors in a project, one can simply use the Hex Codes / RGBs mentioned or use the Color Picker for accuracy.

03 TYPOGRAPHY

Typography plays a key role in creating a clear, modern, and consistent visual identity. AOSSIE uses **Inter** as its primary typeface for all digital and print communications.

Since, we would need to implement a font in many of our projects, the priority need is to have a scalable, optimized and readily available font. We cannot risk licensed unoptimized fonts that take more time to load. That being said, a project’s owner can always choose their font pairings for their specific need after approvals and can always fallback to Inter if needed.

PRIMARY TYPEFACE

Heading 2	Inter SemiBold 36 px
Heading 3	Inter Medium 28 px
Body	Inter Regular 18 px
Caption	Inter Medium 14 px
Button	Inter SemiBold 14 px

SOCIAL BANNER

AOSSIE banners are designed to deliver a consistent and recognisable brand presence across digital platforms, events, and promotional materials. By combining the brand's colours, typography, metrics and graphic elements, they ensure every communication feels cohesive and professional.

The **Primary Banner** is used for high-impact brand visibility, while the **Secondary Banner** provides a clean and flexible option for monochromatic needs, presentations, documentation, and supporting communications.

Primary Banner

Secondary Banner

SOCIAL BANNER // Usecase

This example illustrates how the AOSSIE primary banner extends seamlessly into large-format applications such as LinkedIn, Twitter, YouTube, etc.

MEETING BACKDROP

The AOSSIE meeting backdrop extends the brand identity into virtual environments, ensuring a consistent and professional presence across online interactions. Designed with a clean layout, it enhances visibility without distracting from the speaker.

It is intended for use during webinars, virtual meetings, conferences, interviews, workshops, and community events, helping reinforce the AOSSIE brand across every digital touchpoint. **How to use:**

Export the Backdrop into 8x to ensure quality.

ORGANIZATION CARD

This is the official organization card of AOSSiE, If any member wants to issue one for themselves after proper approvals, Just like it is mentioned in the Page 04 on how to copy an element, you can copy this parent component of *card_front* and *card_back* and edit it with your details respectively.

ORGANIZATION CARD // Mock

This is how your personalized card would look in action.

SOCIAL MEDIA POST // Type 1

The Type 1 template is designed for **high-impact announcements and promotional campaigns**. It is best suited for product launches, major updates, feature releases, partnerships, community initiatives, and milestone celebrations where a clear message and strong call to action are the primary focus.

Its bold layout combines a prominent headline, supporting visuals, key highlights, and a dedicated CTA, making it ideal for creating engaging posts that capture attention while maintaining AOSSIE's visual identity and brand consistency.

SOCIAL MEDIA POST // Type 2

The Type 2 template is designed for **informative and community-driven content**. It is ideal for sharing event announcements, workshop details, contributor spotlights, project showcases, blog summaries, educational content, and community updates that require more context.

Its editorial layout prioritises readability by providing dedicated sections for supporting descriptions, visuals, dates, references, and calls to action. This structure ensures information is presented clearly while maintaining a consistent and professional AOSSIE brand presence across all social media platforms.

SOCIAL MEDIA POST // Example

This example demonstrates how the Type 1 social media template can be used to celebrate major community milestones. Designed for the Google Summer of Code (GSoC) 2026 announcement, the post highlights selected contributors in a visually engaging and well-structured format while maintaining AOSSIE's brand identity.

USEFUL ASSETS

These are some utility assets that can be used/ integrated while crafting any media for AOSSIE. (Ex- Social Media Posts, Posters, Banners, etc.)

- Clarity over clutter - Clean layouts and big type that get to the point
- Personality with purpose - Illustrative elements that educate, not just decorate

The AOSSIE backpack demonstrates how the brand identity can be effectively applied to everyday merchandise while maintaining a clean and professional appearance.
